

# Highest Peaks in Himalaya

Himalaya is home to the tallest mountain in the world, some eight-thousander peaks and many more seven-thousander peaks. Most of them have been climbed but a few peaks remain to be conquered by humans. Everet has attracted more mountaineers and claimed more lives than any other mountain in Himalaya but its fatality rate is lower than some other peaks such as Annapurna I.

|                          |                            |                          |                                |                          |                             |                               |                       |                              |                           |  |                            |                              |                       |                        |                   |                   |
